The Sustainable Range Program (SRP) Support Contract is a 5-year, approximately $200 million contract support vehicle developed by the Army to ensure sustainability of U.S. Army military training ranges, lands, and operating areas.

The indefinite delivery, indefinite quantity (IDIQ) contract was awarded in 2004 and the ordering period extends through 2009. This easy-to-use contract vehicle offers firm, fixed-price performance work statements (PWS), with pre-negotiated labor rates to ensure timely, high quality, cost-effective services.

Long lead times are history - PWS procedures for the SRP Support Contract have been refined and streamlined to ensure rapid contracting of SRP support. And because the SRP Contract is an IDIQ Contract, you are free to tailor PWSs to your unique requirement - so that you can buy only what you want, when you want, and where you want.

There is absolutely no fee associated with the use of this contract.

For more information about the SRP Support Contract, contact the ATSC Points of Contact:
